

Faster insights, lower costs

Discovery-related costs can account for up to 70% of the case spend in litigation, and document review is often the largest line item. As a litigator-led company we know this can cause heartburn and tension in the attorney-client relationship.

Proteus has the team, technology, and experience to mitigate that spend defensibly. Our team will cut through the vendor-speak to recommend solutions and analytics features that are appropriate to your goals and the unique needs of the matter.

Experience and insights for your matters

Our Project Management team averages more than 10 years of industry experience each and holds certifications from multiple review platforms, so we can recommend appropriate analytics, predictive coding, quality control (QC), and privilege workflows based upon factors including budget, production deadlines, data types, and more.

To protect privilege and ensure a sophisticated understanding of the matter at hand, Proteus only engages with document review attorneys who are US-based and are licensed and in good standing.

Our clients have a direct relationship with the project managers handling their matters. We are committed to providing status updates and reporting based on each client's desired metrics, and the team communicates utilizing collaboration software to ensure questions are surfaced, answered, and documented to provide you a defensible record of decisions.

Technology-agnostic approach

Our review team has completed projects in RelativityOne, Reveal, Everlaw, and many other platforms. Almost half of our engagements are for matters hosted by another eDiscovery vendor or through a client's direct license.

We were early adopters of Technology Assisted Review (TAR) and Continuous Active Learning (CAL), but we know that sometimes linear review is the best approach. Our goal is to provide the best support for your specific matter. We can explain the nuances of each approach in plain language, ensuring your decision balances cost and defensibility.

Scanning Services

Sometimes our clients have paper documents that need to be digitized, as a full-service eDiscovery provider, we are here to help. Our team can scan and digitize your documents, then code them and ingest into the eDiscovery hosting solution of your choice.

Litigator-Led eDiscovery

Our co-founders are former AmLaw 100 litigators. Clients across the country trust us because we provide sophisticated solutions, candid communications, and simple, transparent pricing.

Our goal? To make eDiscovery approachable and straightforward. With our comprehensive solutions and defensible practices, we'll empower you to make informed decisions and achieve the best possible outcomes.

Your core competency is focusing on case merits and strategy; ours is eDiscovery. Together we can do great work.

“Your team is so responsive, they have spoiled me. The whole support team is ON IT. Working with Proteus has been an all-around excellent experience”
